## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

1. Claim 1 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Atari et al. (5413360).

Atari et al. discloses a ceramic substrate having a conductor on a surface or inside thereof (col. 5 lines 23-26). Since Atari et al. discloses the layers desired by the applicant it is inherent that the ceramic substrate has a leakage quantity of  $10^{-7}$  Pa • m<sup>3</sup>/sec (He) or less. In any event, it would have been obvious to one of ordinary skill in the art at the time applicant's invention was made to modify the leakage quantity in order to obtain optimum results.
